Jellyfish or sea jellies are the informal common names given to the medusa-phase of certain gelatinous members of the subphylum Medusozoa, a major part of the phylum Cnidaria. Jellyfish are mainly free-swimming marine animals with umbrella-shaped bells and trailing tentacles, although a few are not mobile, being anchored to the seabed by stalks.

A bee has a pair of large compound eyes which cover much of the surface of the head. Between and above these are three small simple eyes which provide information for the bee on light intensity. The antennae usually have thirteen segments in males and twelve in females and are geniculate, having an elbow joint part way along. They house large numbers of sense organs that can detect touch ...

Notes on Taxonomy and Nomenclature Top of page. Historically there has been much confusion in the classification of the species of the genus *Elodea* (Family Hydrocharitaceae). However, Cook and Urmi-K nig (1985), in the latest revision of the genus, recognize five species of *Elodea*, all of them from the New World: *E. potamogeton* (Bert) Espinosa, and *E. callitrichoides* (Rich.)

In many religious traditions, Hell is a place of suffering and punishment in the afterlife. Hell is endless or eternal. Hell is often portrayed as populated with daemons, who torment the damned.

Christianity considered as a slow, long-term injection of Jewish fiction into Europe, is new, at least to me: from this viewpoint, Christianity was a disaster, more or less comparable with modern-day effect of Jews as frauds, liars, and war-mongers, hating and trying to destroy Europe and whites. Bishops, Popes and so on more or less correspond to 'politically correct' collaborators of Jews.

The whole structure of Western society may well be unfitted for the effort that the conquest of space demands. No nation can afford to divert its ablest men into such essentially non-creative, and occasionally parasitic, occupations as law, advertising, and banking.
