Dental Adhesive Resin Cement - G&N® International

The development of visible-light-mediated allylation of unactivated sp³ C-H bonds is reported. The remote allylation was directed by the amidyl radical, which was generated by photocatalytic fragmentation of a pre-functionalized amide precursor.

Angewandte Chemie International Edition: Early View

The formation of a peptide bond between two amino acids involves two steps. The first step is the activation of the carboxyl group of one residue; this step accounts for a key step in the synthesis of a large number of bioorganic molecules, in particular during peptide synthesis (Sheehan and Hess, 1955). If the activation of carboxylic acid is slow, the coupling reagents will be degraded and ...

Advanced Silicone Materials for Electric Vehicle Electronics IMAGINE Improved Thermal Management, Reliability and Cost-Effectiveness for Electric Vehicle Electronics

Improved Thermal Management, Reliability and Cost

1. INTRODUCTION - A transistor is a small electronic device that can cause changes in a large electrical output signal by small changes in a small input signal. That is, a weak input signal can be amplified (made stronger) by a transistor. For example, very weak radio signals in the air can be picked up by a wire antenna and processed by transistor amplifiers until they are strong enough to be ...

1.4.2.1 Adhesion The ability of a material to adhere or bond to a substrate. The surface energy of both substrate and the liquid being applied are critical factors in obtaining adequate adhesion. Cleanliness of the surfaces is paramount to prevent delamination.

Self-healing materials are artificial or synthetically-created substances which have the built-in ability to automatically repair damage to themselves without any external diagnosis of the problem or human intervention. Generally, materials will degrade over time due to fatigue, environmental conditions, or damage incurred during operation. Cracks and other types of damage on a microscopic ...

Self-healing material - Wikipedia

Ecology (from Greek: ἔκος, "house", or "environment"; -λογία, "study of") is the branch of biology which studies the interactions among organisms and their environment. Objects of study include interactions of organisms with each other and with abiotic components of their environment. Topics of interest include the biodiversity, distribution, biomass, and populations of organisms ...

JNN is a multidisciplinary peer-reviewed journal covering fundamental and applied research in all disciplines of science, engineering and medicine.

Journal of Nanoscience and Nanotechnology

- It is distributed four times a year. The first volume was published in september of 2010. - publishes high-level Communications, Research Articles and Mini-Reviews related to all field of electrochemical science and technology.
