

cataract and refractive surgery pdf

Refractive eye surgery is an eye surgery used to improve the refractive state of the eye and decrease or eliminate dependency on glasses or contact lenses. This can include various methods of surgical remodeling of the cornea (keratomileusis), lens implantation or lens replacement (cataract surgery). The most common methods today use excimer lasers to reshape the curvature of the cornea.

How Much Does Cataract Surgery Cost? Complete Price

A cataract is a clouding of the lens in the eye which leads to a decrease in vision. Cataracts often develop slowly and can affect one or both eyes. Symptoms may include faded colors, blurry vision, halos around light, trouble with bright lights, and trouble seeing at night. This may result in trouble driving, reading, or recognizing faces. Poor vision caused by cataracts may also result in an ...

Slide 13 MJC3 Notes: "In many developed countries this can be at even at 6/6..." Is this a typo? Maybe 6/60? Really should be 6/18 or 20/40. Marissa Carter, 6/2/2011 I2 Not a typo: referring to the fact that in developed countries patients can get cataract surgery as soon as they are symptomatic, despite of very good visual acuity when measured. 6/6 is probably not so common, I have changed to ...
