Malaria is the most important of all tropical diseases, causing many deaths and much morbidity. It is widely distributed in the tropical and subtropical zones. There are four parasite species that cause human malaria, all of which belong to the genus Plasmodium: 1. P. falciparum (malignant tertian malaria, subtertian malaria). 2.

UNIVERSITY OF ORADEA FACULTY OF MEDICINE - Captainjoe.info

More than 70% of countries and territories that report the presence of neglected tropical diseases are low-income and lower middle-income economies. Infections are attributable to unsafe water, poor housing conditions and poor sanitation. Children are most vulnerable to infections of most neglected tropical diseases.
