

resources values and development pdf

A resource is a source or supply from which a benefit is produced. Resources can broadly be classified upon their availability—they are classified into renewable and non-renewable resources. They can also be classified as actual and potential on the basis of level of development and use, on the basis of origin they can be classified as biotic and abiotic, and on the basis of their ...

Freud: Morality and the Superego: The founder of psychoanalysis, Sigmund Freud, proposed the existence of a tension between the needs of society and the individual. According to Freud, moral development proceeds when the individual's selfish desires are repressed and replaced by the values of important socializing agents in one's life (for instance, one's parents).
