Integral Equations and Operator Theory (IEOT) is devoted to the publication of current research in integral equations, operator theory and related topics with emphasis on the linear aspects of the theory. The journal reports on the full scope of current developments from abstract theory to numerical methods and applications to analysis, physics, mechanics, engineering and others.

In Galileo's time-- science began using man's most reliable truth detector---- "Repeatable published physical measurements of the thing under study coupled with vigorous technical debate using a common language called mathematics". It works! A popular example of it working is forensic medicine in law enforcement. Compare today with technology with 50 years ago.
