The goal of these 2 components is to construct a global equity portfolio with high expected returns (over the long-haul). We think our value and momentum strategies are differentiated from the rest of the pack for the following key reasons: Focused exposure, heavy R&D efforts, and our unique approach.

The Global Value Momentum Trend Philosophy

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
