Eternal September or the September that never ended is Usenet slang for a period beginning in September 1993, the month that Internet service provider America Online (AOL) began offering Usenet access to its many users, overwhelming the existing culture for online forums.. Before then, Usenet was largely restricted to colleges and universities. Every September, a large number of incoming ...

Eternal September - Wikipedia
The Sieve of Eratosthenes is a simple algorithm that finds the prime numbers up to a given integer.. Task. Implement the Sieve of Eratosthenes algorithm, with the only allowed optimization that the outer loop can stop at the square root of the limit, and the inner loop may start at the square of the prime just found.

The Fibonacci sequence is a sequence F_n of natural numbers defined recursively: . $F_0 = 0$ $F_1 = 1$ $F_n = F_{n-1} + F_{n-2}$, if n>1 . Task. Write a function to generate the n th Fibonacci number. Solutions can be iterative or recursive (though recursive solutions are generally considered too slow and are mostly used as an exercise in recursion).

In computer science, bogosort (also known as permutation sort, stupid sort, slowsort, shotgun sort or monkey sort) is a highly ineffective sorting algorithm based on the generate and test paradigm. The function successively generates permutations of its input until it finds one that is sorted. It is not useful for sorting, but may be used for educational purposes, to contrast it with more ...

1.1.2 A general description of Python. Python is a high-level general purpose programming language: Because code is automatically compiled to byte code and executed, Python is suitable for use as a scripting language, Web application implementation language, etc.

A Python Book: Beginning Python, Advanced Python, and
Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Given two date ranges, what is the simplest or most efficient way to determine whether the two date ranges overlap? As an example, suppose we have ranges denoted by DateTime variables StartDate1 to EndDate1 and StartDate2 to EndDate2.

datetime - Determine Whether Two Date Ranges Overlap

This is the second installment of the blog series on TokuDB and PerconaFT data files. You can find my previous post here. In this post we will discuss some common file maintenance operations and how to safely execute these operations.
