Web analytics is the measurement, collection, analysis and reporting of web data for purposes of understanding and optimizing web usage. However, Web analytics is not just a process for measuring web traffic but can be used as a tool for business and market research, and to assess and improve the effectiveness of a website. Web analytics applications can also help companies measure the results ...

Methods of Comparing Images Compare Program The "compare" program is provided to give you an easy way to compare two similar images, to determine just how 'different' the images are. For example here I have two frames of a animated 'bag', which I then gave to "compare" to highlight the areas where it changed.

There is a lot packed into this definition so let's break down each of the significant terms so that we can better understand what it means. Comprehensive “good change management must look at the organization's people, culture, processes, infrastructure, and technology. Today, there are many who say that change management is the people side of change.
