

what are pollution smoke pdf

Pollution is the introduction of contaminants into the natural environment that cause adverse change. Pollution can take the form of chemical substances or energy, such as noise, heat or light. Pollutants, the components of pollution, can be either foreign substances/energies or naturally occurring contaminants. Pollution is often classed as point source or nonpoint source pollution.

Pollution - Wikipedia

Air pollution occurs when harmful or excessive quantities of substances including gases, particles, and biological molecules are introduced into Earth's atmosphere. It may cause diseases, allergies and even death to humans; it may also cause harm to other living organisms such as animals and food crops, and may damage the natural or built environment. ...

About the Air Pollution and Respiratory Health Program (continued from previous page) CDC partners with state health departments in 29 states and the District of Columbia to develop asthma control

About the Air Pollution and Respiratory Health Program

Air pollution is usually described as either primary pollutants or secondary pollutants. Primary pollutants are pollutants that are put directly into the air by humans or natural sources. Examples of primary pollutants are exhaust fumes from cars, soot from smoke, dust storms and ash from volcanic eruptions (as seen in the picture on the left). ...
